Important information about

FACE COVERINGS

Cloth Mask

Bandana

Scarf

Cloth Covering

When using a cloth face covering, make sure:

- Your mouth and nose are fully covered
- Your covering fits snugly against the sides of your face so there are no gaps
- You do not have any difficulty breathing while wearing your cloth face covering
- Your cloth face covering can be tied or otherwise secured to prevent slipping
- You wash your cloth face covering after each use in the washing machine or by hand using a bleach solution. Allow it to completely dry

FOLLOW THESE STEPS

To keep yourself and others healthy

Wash your hands frequently. Use soap and water and lather for 20 seconds or use an alcohol-based hand sanitizer. Wash your hands before and after eating, as well as after you've used the restroom, blown your nose, coughed or sneezed.

Keep your phone in your pocket or bag. Phones carry a lot of germs. Do not place cell phones or other personal items on shared surfaces, and do not share your phone. Sanitize your phone with rubbing alcohol daily.

Sanitize shared equipment before and after use. Be mindful of what you use and touch in shared spaces such as kitchens and conference rooms.

Maintain at least 6 feet of distance from others. COVID-19 spreads through respiratory droplets when an infected person coughs, sneezes or talks. Staying at least 6 feet apart—about two arm-lengths—reduces the risk of infection.

Avoid touching your face and face covering. To avoid transferring germs, do not touch your eyes, nose or mouth. A face covering is meant to protect other people in case you are infected. It is not a substitute for social distancing. Wash your hands immediately after removing your face covering.
