Member of the Yale community is tested for COVID-19 infection. **Result is positive.**

Result goes to **primary healthcare provider** who contacts the patient. Patient is asked to self-isolate, and is provided with additional guidance and referrals.

Patient is contacted by the **Yale Contact Tracing Team (YCTT).**

Patient may be contacted by their **local health department.**

Campus-based contacts of the patient (whose privacy will be respected) are identified and notified by **YCTT** of possible exposure.

Community-based contacts of the patient may be identified and notified by their **local health department** of possible exposure.

Close contacts are

- offered testing and are requested to
- self-quarantine for 14 days and
- monitor symptoms

Lower-risk contacts are

- offered testing and are requested to
- monitor symptoms
